Included Items: 1x flashlight with powerbank, 1x Cable

Features:

- Bright LED CREE 3W Globe, 150 Lumen
- Heavy-duty Aluminium Casing
- Side Windows to Disperse Light
- High Capacity Powerbank 2000mAh
- Shockproof & Splashproof IP64
- 3 Modes of Operation: High Beam 5 hrs, Low Beam 20 hrs, Strobe 10 hrs
- Beam Distance 200m (max)
- Charge time: 4 Hours (RED charging, Blue full)
- Input: Micro USB 5V DC / 1A
- Output: USB 5V DC 1A
- Dimensions: Length 120mm, Width 25mm
- Built-in Lithium Polymer Battery
- Recharge cycles: 500 - 700 times
- Short-circuit & Over Current Protection
- Weight : 120g
- Reliable Performance & Simple to Use
- Easy to Recharge via USB Cable
- Safe and Robust Design
- 1 Year Limited Warranty

Specifications claimed and tested by manufacturer

Charging:

- Gently lift the rubber back cover revealing the ports.
- Insert the provided micro USB cable into the back charging port (smaller) of the powerbank.
- Make sure to insert pin the correct way and do not use force or the port could break.
- Plug in the other side of the cable with standard USB jack into a USB socket on PC, laptop or charger.
- A light in the port will show RED when charging and BLUE when full.
- Charging time may vary from 4-5 hours depending on the USB supply.

Recharging is easy and safe as the battery cannot be overcharged. The charger will stop charging once full. Lithium Polymer batteries do not have memory and can be recharged anytime. Life span of a battery is about 500-700 charge cycles if used correctly.

Although the unit arrives partially charged from the factory, it must be fully charged for 4 hours before first use. This initial charge pre-conditions the battery for full capacity. Failure to charge may shorten the life span of the battery. Once the battery gets flat, recharge the battery immediately as it could get damaged if left very flat for long periods.

Operating:

Recharging devices:

- Connect your USB rechargeable device using the provided cable or specific devices cable to the USB output port on the back of the powerbank. Charging will begin automatically.
- This powerbank is estimated to recharge a standard Smartphone about 60% full.

- Many devices such as Mobile Phones, Smartphones, Tablets, GPS, MP3 Players, Portable Speaker, Bluetooth Headsets can be recharged from this powerbank.

Note that not all USB rechargeable devices will be able to be charged.

LED flashlight:

- Press the back button to switch the LED light ON
- Press once to change between modes (high, low or strobe beam)
- 3 Modes of Operation: High Beam 5 hrs, Low Beam 20 hrs, Strobe 10 hrs

This flashlight is equipped with a bright LED light and magnifying lens to illuminate a focused beam. There are 4 side windows located at the front of the flashlight which spreads out some of the light to cover a wide area. This flashlight with powerbank combination is ideal for travelling, outdoor and general use. They are especially useful during power outages. LED globes are shockproof and never need replacing. The Aluminium casing is durable and lightweight and this flashlight is an essential part of any tool kit whether for home or work. Applications include security, handymen, contractors, truckers, travellers, hikers, campers, workshops, boating, fishing, etc.

WARNING!

- Fully charge the flashlight with powerbank before storing for long periods. Keep recharging every few months or the battery may go faulty.
- **HIGH BRIGHT BEAM:** Avoid direct eye exposure or serious eye injury could result.
- To prevent damage to eyesight, never look into light when on.
- Do not shine in any face. This item is not a toy. Keep out of reach of children
- Do not recharge in the rain or wet conditions.
- Never attempt to recharge if the port or wire is damaged or frayed
- Do not dispose in a fire or ordinary waste.
- Do not operate in high temperature, hazardous or explosive environments.
- Do not subject the powerbank to strong impacts.
- Do not disassemble or modify the flashlight with powerbank as it contains protective devices which, if damaged, may cause the battery to heat or ignite.
- Do not leave or use in hot spaces for extended periods when temperatures are over 60 °C.
- Never short circuit, reverse polarity, disassemble, damage or heat the battery packs over 100°C. If an exploded Li-poly battery does ignite, it will burn more violently if it comes into contact with water or moisture. Never put water on a burning Li-poly battery only use a fire extinguisher.
- This flashlight with powerbank is water resistant only but not submersible or rain proof. If it gets submersed in water, immediately dry and do not use for a few days. Water damage is usually irreparable.

Maintenance:

All batteries lose charge over time. It is recommended that the flashlight with powerbank should be fully recharged every 2-3 months when not in use.

If the unit gets dirty, gently clean the outer surface of the flashlight with powerbank with a soft cloth moistened with a mild solution of water and detergent.

Store in a cool, dry place.

Warranty:

Your Zartek flashlight with powerbank has a 12 month factory fault warranty. This is applicable from the exact date of purchase. Proof of purchase will be requested.

The factory fault warranty only includes issues with the product manufacturing process. Not included are any damages or faults caused or induced by use of the product. This is because of the high level of quality control checks placed on this product before it reaches the user.

This product is to be used fully at your own risk for its intended purpose. The supplier, manufacturer, distributor or seller hold no accountability or responsibility whatsoever, in case of damage or harm caused from using this product.

Important instructions. Retain for future use.
